Accounts Payable

Streamline Accounts Payable – Increase Productivity

Looking for ways to work faster and smarter. You're not alone. Many paper-intensive departments, like account payable, have turned to Systemware to help them streamline processes, cut costs and increase productivity.

With Systemware, you are able to easily capture, organize, access, manage and route invoices and any other type of financial documents as well as seamlessly integrate with existing financial and other third-party applications to speed financial processing and payments. Systemware combines document imaging, automated data capture, records management, userconfigurable workflows and system integration allowing for the acceleration of invoice processing turnaround allows users to avoid late payment penalties and take advantage of early-pay discounts.

Systemware also seamlessly integrates with existing ERP, financial reporting and third-party applications – providing better visibility into liabilities to help users make better informed financial decisions.

Key Benefits

- ▶ Increase AP productivity
- ▶ Minimize manual costs
- ▶ Reduce errors and delayed payments
- ▶ Reduce late payment penalties
- ▶ Take advantage of prompt payment discounts
- ▶ Gain greater visibility into AP processes
- ▶ Support compliance and control

Improve Access to Information

Automatic Capture Reduces Manual Data Entry - Automatically capture critical AP content from any paper-based or electronic document type, including invoices, bills of lading, check requests, purchase orders, packing slips, inventory reports, and checks reducing manual steps and consequently processing errors.

Improves Cycle Times – Streamline your AP processes – from invoice arrival to approval to archive – reducing the costs and hassles of verification and exception handling.

Increases Access and Visibility – Intelligently organize your information into electronic folders, making it a snap to find what you need, when you need it. **Deploys Quickly - SaaS Model** – Get all of the benefits of a full-featured accounts payable solution, but without the onerous upfront capital investment or ongoing IT support headaches. With our SaaS delivery model, you'll also be up and running – and achieving a return on your investment.
