# SharePoint® Integration

## Maximize and Enhance SharePoint

Now more than ever, companies like yours look to technology to streamline processes and increase productivity. When it comes to document management, Systemware allows you to maximize your SharePoint investment while expanding your ability to capture, access and manage all enterprise information regardless of original format, location or platform.

Systemware gives you the ability to quickly scan paper documents as well as capture other types of information directly into SharePoint. Our advanced content extract allows users to easily pull data from a wide variety of documents types including bar code and optical character recognition.

In addition to expanding the ways to capture information into SharePoint, Systemware increases your ability to access enterprise content. With Systemware, you are able to still take advantage of SharePoint's strengths – document collaboration, workflow, etc. – while also providing you with one system to find SharePoint documents as well as related content from other applications. This includes information stored in other business applications such ERP systems, as well as any number of existing ECM solutions on a variety of platforms – Linux, AIX, Sun, and z/OS.

## Key Benefits

- ▶ Enhances the effectiveness of SharePoint
- ▶ Increases productivity with one place to go for all enterprise information
- ▶ Expands the types of documents and information that can be easily captured in SharePoint
- ▶ Improves storage capabilities while reducing costs
- ▶ Provides comprehensive record management capabilities in accordance with your regulatory and business requirements

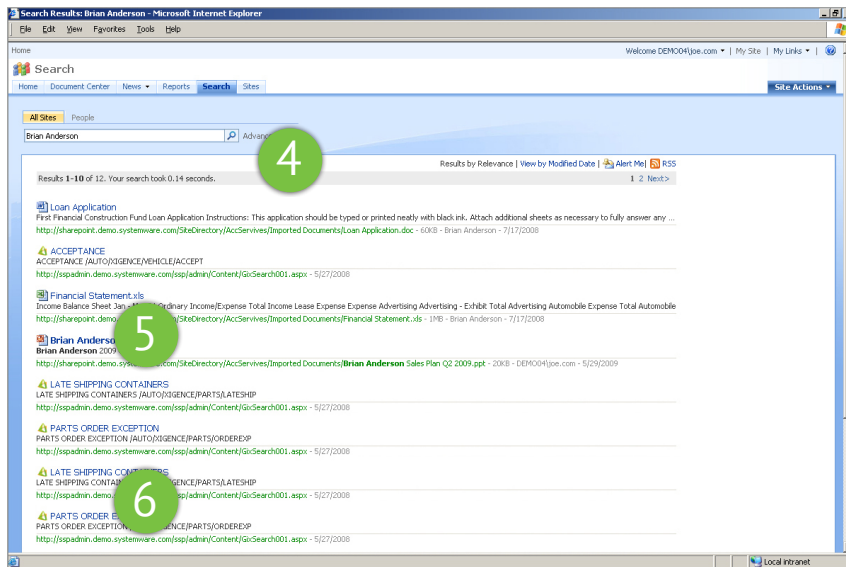

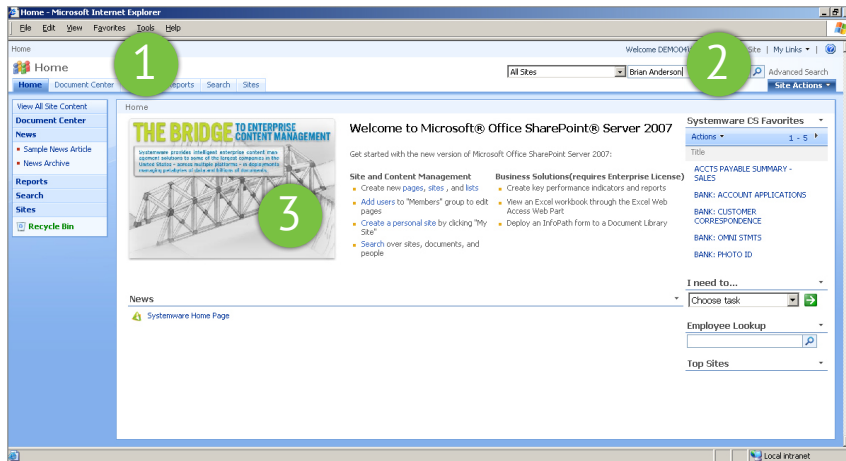

## Advanced ECM

Systemware also provides a better way to store of all your SharePoint documents and enterprise content. With unsurpassed scalability at high speeds, Systemware gives you an efficient long-term storage solution for all documents and content. For increased performance, information can be stored based on content type, document format as well as content compression further increasing your storage capacity.

Systemware captures, indexes, and securely stores all SharePoint documents seamlessly in our repository, creating an "archive of record" for enhanced records management and compliance.

# Systemware SharePoint Integration

- 1 Offers the ability to collaborate and access enterprise content all within the easy to use SharePoint portal, dramatically reducing the need for training.
- 2 Provides one place to search for all enterprise content regardless of whether it resides in SharePoint, Systemware and/or in other systems.
- 3 Leverages the existing SharePoint security standards for single sign on to enterprise documents and information.
- 4 Creates one consolidated list of search results including documents and information across the enterprise.
- 5 Delivers search results that include documents stored in SharePoint.
- 6 Delivers search results that include documents and other content types stored across the enterprise on a variety of platforms – z/OS, Unix, Linux, etc.

## About Systemware

Systemware provides ECM solutions to some of the largest US organizations – across multiple platforms – in deployments managing petabytes of data and billions of documents. Systemware enables customers across a wide range of industries to make better business decisions, capitalize on information assets, improve productivity while reducing costs and ensuring compliance. Founded in 1981, Systemware is a privately-held corporation headquartered in Addison, Texas, with branch offices throughout the United States.
