# Webtop Client

## Expand the Ability to Find and Use Key Enterprise Information

Systemware user interface provides Web access to all enterprise information stored across the enterprise. Our intuitive menu-driven navigation for most commonly used functions – download, email, print, and index filtering – is a valuable time saver.

Webtop Client not only has enhanced search capabilities, including express search and advanced search, but also provides the ability to save searches, shortcuts, and subscriptions for subsequent use. The flexible one-click sort capability makes accessing most search and results information quick and easy.

This simple Web-based tool for viewing electronic output also allows users to personalize views. Users are able to categorize groups of shortcuts to documents and folders, link various documents to show their relationship, and list recently viewed documents.

And with Webtop Client, users can also retrieve computer-generated output and view it in a variety of formats including: Microsoft Excel, PDF, XML, HTML, TIF, and more.

## Features

- Powerful document search and retrieval capabilities across multiple repositories including:
  - Advanced, express and full text Search
  - Ability to save searches for reuse
  - Point and click drill-down navigation through folders to documents
  - Flexible one-click sort of lists resulting from search and navigation
- Supplies common interface to information from extremely diverse systems
- Creates compound documents with one click
- Provides a simple flexible tool for users to personalize views for easy access to documents and folders
- Provides annotation tools enhancing the ability to communicate important information associated with documents and content
- Seamless platform support for both z/OS and distributed (Unix, Linux, Windows)

## Benefits

- Improves productivity with immediate access to information across the enterprise
- Significantly reduces the time spent searching and retrieving information
- Improves service performance and customer satisfaction
- Allows for faster and better-informed decisions
- Extends the benefits of archive, retrieval, and viewing of reports to users and systems beyond the mainframe through seamless multi-platform support

## System Requirements

- Systemware Content Server
- Web Browser:
  - Internet Explorer 6.0+
  - Netscape 7+
  - Firefox1.0.5+
