How a Fortune 500 retail pharmacy saved millions in software licensing fees and storage costs with Systemware's Content Cloud and conversion processing tools.

Systemware's conversion processing tools help Fortune 500 retail pharmacy decommission ASG Mobius ViewDirect in four months, saving millions in software fees and storage costs.

Executive Summary

To improve output report management and delivery, this Fortune 500 retail pharmacy needed to modernize and simplify its enterprise content management (ECM) ecosystem. With four separate ECM software products, including ASG Mobius ViewDirect, there were several issues the company needed to address:

- **Improve** report management and retrieval for documents stored across multiple platforms and repositories

- **Enhance** the functionality in how reports were captured, repurposed, and retained

- **Consolidate** the number of ECM software products

- **Reduce** storage costs and overall license fees

The company decided the first step toward a modern, efficient ECM platform was decommissioning ASG Mobius ViewDirect and replacing it with Systemware's Content Cloud for better content management, search, and extraction functionality. With the Mobius licensing contract renewal deadline fast approaching, the company also needed to find a rapid, reliable way to move off the Mobius platform. They found the right partner with experience in managing complex data rationalization projects – Systemware.

Solutions

Systemware: A trusted, experienced partner

Systemware, a content services platform provider, was the logical choice having built a reputation of helping organizations with complex data conversions. They have successfully assisted large companies retire ECM software products like ASG Mobius ViewDirect, CA View/Deliver, and IBM RMDS/CMOD.

Systemware Legacy Archive Processor: A proven, fast approach to retire ASG Mobius ViewDirect

The Mobius license represented redundant technology and substantial licensing fees. After a proof of concept, it was clear that Systemware had the processes and tools to retire the Mobius platform with time to cutover to Content Cloud, while mitigating the need to physically migrate the Mobius content. And they did in four

Solutions

- **Systemware implementation experts and methodology**
- **Systemware proprietary Legacy Archive Processor conversion tool**

months with Systemware's Legacy Archive Processor (LAP) – no need to sign another multi-year contract for Mobius.

Systemware's automated data migration process is a defined and proven approach. The LAP is a fast, reliable methodology that has been used successfully with multiple customers. "Our approach starts with a comprehensive end-to-end consultative analysis, so nothing gets missed," said Sean Furrh, Systemware Director of Solutions Delivery. "We learn everything about your content and processes. Then data conversion is made fast and reliable with proprietary conversion tools and a proven approach, our Legacy Archive Processor."

But the LAP is more than a tool; it's a proven data rationalization methodology that systematically addresses every data touchpoint. The process ensures each document is accessible on a consistent, repeatable basis moving forward. Systemware starts with a deep dive understanding of each piece of content in the legacy system – from its metadata to how it's stored and distributed – all which is loaded and mapped into Content Cloud.

With the company now free from Mobius, the benefits of moving to Content Cloud have far exceeded their original goals. Systemware's LAP accelerated the conversion process and Content Cloud software modernized and future-proofed the company's ECM ecosystem – and lowered costs.

Benefits

• Converted from ASG Mobius ViewDirect software in four months

• Converted legacy data without moving any content

• Saved on software licensing fees, storage, and compute costs

• Enhanced user and customer experience

• Modernized ECM platform and ecosystem

• Enabled enterprise insight, visibility, and security

About Systemware

Systemware has been a pioneer in enterprise content management for forty years, helping the world's most highly regulated organizations capture content from a variety of systems, find it wherever it is stored and deliver it in the context needed for each business line. Their content services platform, Content Cloud, helps organizations modernize their content management, interoperate with a range of repositories and systems, automate their processes, personalize their experience, and enable their content for business intelligence. Systemware is committed to ensuring organizations meet information governance requirements in a manner that optimizes cost and complexity while providing a tailored user experience.
